17.17 What is wrong in the following code?

```java
import java.io.*;
public class Test {

  public static void main(String[] args) {
    try (
          FileInputStream fis = new FileInputStream("test.dat"); ) {
    }
    catch (IOException ex) {
          ex.printStackTrace();
    }
    catch (FileNotFoundException ex) {
          ex.printStackTrace();
    }
  }
}
```

-Programming Exercises

*17.2 (Create a binary data file) Write a program to create a file named Exercise17_02.dat if it does not exist. Append new data to it if it already exists. Write 100 integers created randomly into the file using binary I/O.
